

## ◆OSGS プログラム後期講義テーマ “Decade (10 years) Project”

The OSGSP participants will work on a project called “Decade (10 years) Project” with University of Findlay students. Saitama and Findlay students will select a decade for research (e.g., 1650-1660, 1960-1970 or 2000-2010) together. Collectively, they will study the chosen decade from various viewpoints. For example, if the group has chosen 1990-2000, one Saitama student may research on US fashion and one Findlay student may collect information on Japanese fashion during the decade. Another Saitama student may choose to study about music and movies in the US and a Findlay student may explore about Japanese music and movies during the same time period. Students will not only collect information online but also interview people about the topic of their choice (e.g., fashion, music, sports, natural disasters, big scandals, movie). The final presentation will be conducted jointly during the University of Findlay’s Symposium for Scholarship and Creativity in early April.

The OSGSP participants will participate in the presentation online while Findlay students will do the presentation in person.
