1 What are High Schools in the Japanese Educational System?

High schools are generally 3 to 4-year schools for people who have graduated from junior high school. Unlike elementary and junior high schools, you must pass an exam to enter high school. Even after you enter high school, you may not be able to proceed to the next grade or graduate if you don't perform well in class.

High schools also offer various club activities and events throughout the year (such as single-day and overnight field trips, sports days, and school festivals).

※Students born in April through the following March are in the same grade.
